

by its intense blackness, the red reflection of other Chimpanzees not being visible; also by the bald head, whence of course the name. The nostrils of this Ape, as of Johanna, were somewhat expanded, and thus present a certain likeness to the Gorilla. But there can be no suggestion that *A. calvus* is the product of a union between the two African Anthropoids. As Is

Wiedersheim's *Structure of Man*.)

the case with Johanna, Sally was given and enjoyed animal food on occasions. It is a curious fact that both Sally and Johanna appear to have been colour-blind.

The Orang Utan, genus *Simia*, has but one definable species, viz. *S. sadyrus*. The supposed species of Owen, & *morio*, cannot be satisfactorily defined. Plenty of other specific names have also been given to what is in all probability but a single species of large Anthropoid Ape inhabiting the islands of Borneo and Sumatra.
